***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/09/2006 has been entered.

**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: Prior art fails to disclose a receiver circuit with an amplifier whose operating point is set by a control terminal which is changed between two values at a user end by a user. Also, prior art fails to disclose a receiver circuit comprising: an optical reception device for generating a data signal in response to a received optical signal; an amplifier circuit comprising: a first transistor having a control terminal connected to receive the data signal from the optical reception device, a first terminal coupled to ground, and a second terminal, a second transistor having a control terminal connected to the second terminal of the first transistor, a first terminal coupled to the control terminal of the first transistor, and a second terminal coupled to an operating voltage source, a first configurable impedance network connected between the control terminal of the first transistor and the second terminal of the second transistor, and a second configurable impedance network connected between the operating voltage source and the second terminal of the first transistor; and means for controlling the first and second configurable impedance networks such that, in a first operating mode, the first configurable impedance network generates a relatively high impedance and the second configurable impedance network generates a relatively low

impedance, and in a second operating mode, the first configurable impedance network generates a relatively low impedance and the second configurable impedance network generates relatively high impedance.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
